

Android DemoClient Installation Guide:

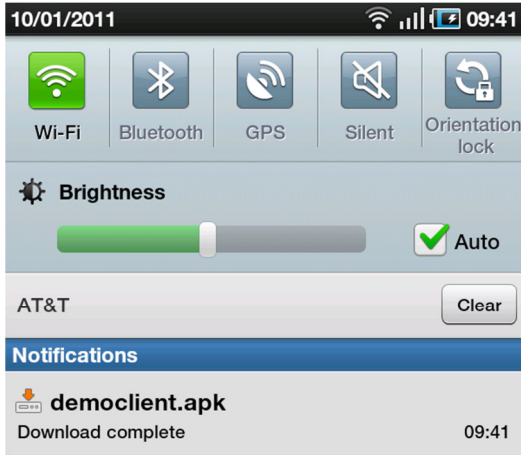

1. Allow non-Market application – under setting – applications (Unknown sources).

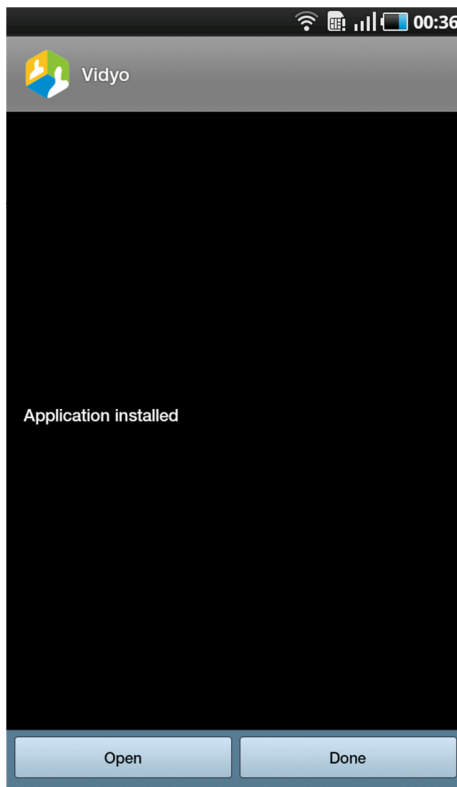

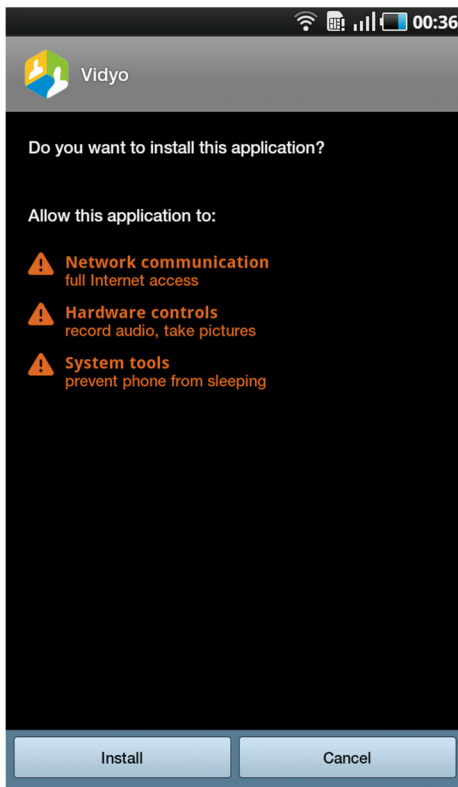

2. Open the device internet browser and download the Vidyo application from the following URL <http://mobiledemo.vidyo.com/mobile/democlient.apk>

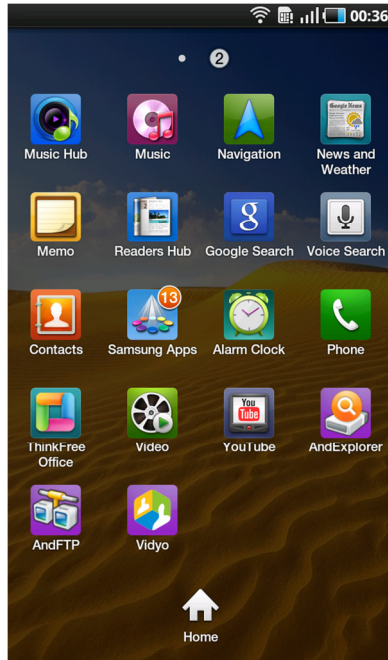

3. Go to downloads and click on the downloaded application.

4. Install the Vidyo application.

You should now see the Vidyo demo application as part of the applications list.

Use the Android_Client_User_Guide for information how to operate the Vidyo App.

Notes:

1. mobiledemo.vidyo.com has a Vidyo24by7 room system sending 720P.
2. The phone performance is really depends on the WiFi quality, if you have issues best to turn off and use 3G.
